EXPERIENCE

GitLab

Open Source Contributor

tinyurl.com/dhhjwyup

Sept 2025 - Present

- Contributed 100+ merge requests across both frontend and backend, using technologies like Vue, Ruby on Rails, Jest, and more.
- Implementing key useful features like adding search panel for respository file tree, restore version and create from template functionality for wiki, navigate to search results on the pipeline logs page and more leading to a noticeable improvement in user experience.
- Won notable contributor award from GitLab for consistent high quality contributions that lead to noticeable improvement in the product.
- Working on code maintenance, optimization and substantial number of bug fixes that improved the reliability, performance and maintainability of the product.

Fetchly Labs

Software Engineer, Full-time

USA, Remote

May 2023 - Feb 2025

- Collaborated with team to translate client requirements into test-driven, cross-browser compatible, and type-safe web and mobile applications using TypeScript, React, Vue, React Native, and Jest.
- Partnered with clients to gather requirements and deliver tailored software solutions aligned with business objectives.
- Conducted code reviews to maintain high standards of reliability, scalability, and maintainability.
- Implemented CI/CD pipelines using GitHub Actions to automate React Native releases, reducing development time by over 20%.

Amnil Technologies

Software Engineer, Full-time

Nepal, Remote

Oct 2021 - May 2023

- Built reliable, SEO-optimized web applications using Next.js, React, Angular, chatbot integrations, and REST APIs with Node.js.
- Conducted code reviews and provided technical guidance to developers to ensure reliable and maintainable code.
- Mentored software engineering interns in data structures, algorithms, and modern web dev practices.
- Maintained and optimized legacy web applications, improving performance by 30%+ through profiling, lazy loading, and performance tuning techniques.
